

I am terribly disturbed that more information is not being shared with citizens about the huge media consolidation being proposed in less than a month. If it were being covered on TV and in the newspapers, I wouldn't be so concerned. The fact that the media is ignoring this says that they are not looking out for the public interest. Since this is your responsibility, please slow this process down until the vast majority of Americans are aware of its impact. In a democracy, we are only as free as the diversity of information we receive. Thank you for listening to me and please give my fellow Americans more time to also be better informed.
